

FACT SHEET for Part 2 of 10 Biggest Mistakes Made By Lawn Care Contractors, homeowners including homeowners kids

Ten (10) Biggest Mistakes Made By Lawn Care Contractors, homeowners including homeowners kids - Stuff lawn mowing contractors do that is wrong, and just need correcting!

The second lot of 5 mistakes are:

6) Did I say no catcher? If I didn't then I am telling you now to never NOT use a catcher!

7) Over watering, you would be surprised the number of calls I get from people that have killed their lawn with kindness by over watering. Warm season grasses need heavy but infrequent, basically the Sydney rainfall covers this.

8) Weed n feed products – don't use these damn weed n feed products, they are a waste of money as they try to do 2 jobs at once that really should be done at different times.

9) Killing grass with herbicides – this happens cos people don't calibrate their sprayers properly and consequently put too much poison out. The herbicide labels tell you how much herbicide needs to be applied to every 100 square metres, so you need to calibrate your water output.

10) Mowing the grass too short – this mistake is a favourite with the kids, I mean why bother mowing the lawn every week in summer when you can shave it right back and only have to mow every 3 weeks, mmm, good one kids. Let me tell you, this is a big NO NO. Why? This will weaken the grass and allow weeds to flourish, I mean do this and you can call LawnGreen in to fix the weeds.

A couple of other mistakes while we are at it!

11) Planting the wrong grass in your Lawn

12) Topdressing the lawn in winter
